

All the music you want. All over your house.

Control your entire Sonos system from any iPhone or iPod touch.

Sonos Controller for iPhone

The Sonos™ Controller for iPhone is a free application that turns your iPhone (or iPod touch) into a full-fledged Controller for the Sonos Multi-Room Music System. When combined with Sonos ZonePlayers™ in the rooms of your choice, you can find and play all the music you want, all over your house. Whether you're enjoying music from your personal music collection stored on your computer, free Internet radio, or the most popular online music services, the Sonos Controller for iPhone gives you total control at the touch of a finger. And you can download it on the App Store in seconds.

Just grab your iPhone and touch the screen to pick a room, point and flick to pick a song, and then hit play. You can search for your favourite song or station on the touch-screen keyboard or choose one of your iTunes playlists. Simply link and unlink zones to play different songs in different rooms or play the same song in every room in perfect synchronization. With the Sonos Controller for iPhone you can wirelessly control your entire Sonos system over your home WiFi network. Use it as your only Controller or in combination with the handheld and desktop Sonos Controllers for the ultimate in control and convenience.

Key Features

- Wireless, multi-room control from any iPhone or iPod touch
- Touch-screen simplicity
- Instant access to endless music
- New features and music services with automatic updates

Sonos Controller for iPhone

Wireless, multi-room control from any iPhone or iPod touch

Control all your music and all your rooms from any iPhone or iPod touch. Take it out of your pocket and play classical in the kitchen and your favourite radio station in the bedroom. Or choose party mode and listen to rock in every room of the house, perfectly synchronized. With the Sonos Controller for iPhone you can wirelessly control your entire Sonos system over your existing home WiFi network.

Find, discover and control your music with touch-screen simplicity

Control your entire music experience with a touch of a finger. Quickly search for your favourite artists or radio stations by typing on the touch-screen keyboard. Browse through albums by pointing and flicking. Link and unlink zones with a tap. And control the volume in any room from anywhere.

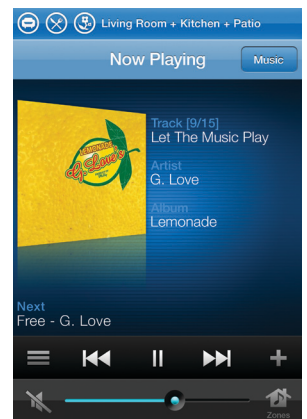

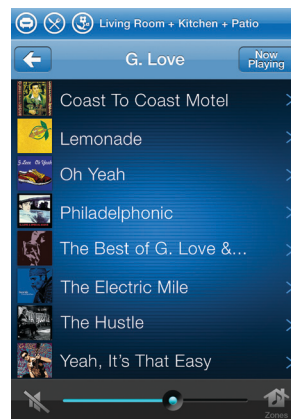

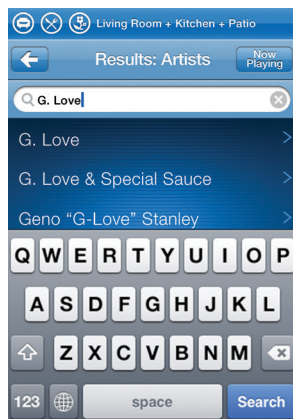

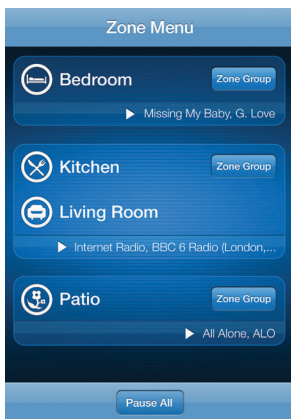

Instant access to endless music

With the Sonos Controller for iPhone in hand, you can find and play any song from your personal collection of music stored on your computer or NAS drive. And Sonos works seamlessly with the most popular music services and thousands of free internet radio stations, so you can stream millions of songs, podcasts, and radio stations from the Internet to the rooms of your choice – all without turning on your computer.

New features and music services with automatic updates

With free automatic software updates you'll always have the newest Sonos features and music services to enjoy. Which means your system will keep getting better even after you buy. And the App Store will automatically notify you when updates are available.

TECHNICAL SPECIFICATIONS

Apple compatibility

Supports iPhone, iPhone 3G, and iPod touch. Requires iPhone or iPod touch software version 3.0 or greater. Latest version of iTunes and software recommended. Sonos cannot wirelessly access music that is stored only on your iPhone or iPod touch.

Sonos hardware requirements

Requires at least one Sonos ZonePlayer. One ZonePlayer (or ZoneBridge™) in your system must be connected to the router and all the rest will work wirelessly.

Sonos software requirements

Version 3.0 or higher

Wireless connectivity*

The iPhone and iPod touch connect to your Sonos system through your existing home WiFi network.

Language support

English, French, Italian, German, Spanish, Dutch, and Swedish.

*Internet connection required for access to Internet radio stations, online music services and software updates (DSL, cable modem or LAN-based high-speed Internet connection required.) Internet functionality may require payment of separate fee to a service provider; local and/or long distance telephone charges may apply.

Note: All specifications subject to change without notice.
